

Port performance dashboard - JNPCT (From 24.03.2017 to 31.03.2017)

Bucket	Metric	Commodity	Best in class Benchmark	Baseline	Achieved	3217.00%	Remarks
Overall port performance	Avg. vessel turnaround time (hours)	Container	24	37	41.76	34	* please refer note below
Berth Productivity	QC productivity (moves/ hr)	Container	30	17	17.04	22	
	Gross Berth Productivity	Container	-	-	66.02		
Yard	RTGC moves per hour	Container	15	6	8.54	10	
	Yard throughput (TEU per Ha)	Container	25,000	24,000	27,786	25,000	
Evacuation	Truck gate processing time (min)	Container	NA	91	25	46	
	Rake turnaround time (min)	Common rail yard proposed, target to be defined post yard design finalized					

Note* - To facilitate installation of new E-RTGCs, realignment / civil works of existing export yards is in progress. This is expected to last till end of April, 2017. The same has impacted loading of exports from yards, equipped with RTGCs. This has led to decrease in Crane / Berth Productivity and increase in Vessel turnaround time. Expected to normalise / improve once the yards are recommissioned.
