jnpaport At the heart of JNPA's infrastructure transformation lies the Centralized Parking Plaza (CPP), a facility that has redefined how we manage export containers. Originally conceived to alleviate traffic pressure, the CPP has evolved into a sophisticated hub capable of handling 2,830 tractor-trailers with a stacking capacity of 4,500 TEUs.

The CPP's impact extends far beyond its impressive capacity numbers. We have built an ecosystem designed to support the long-haul journey, providing essential amenities such as a 50-bed dormitory, a cafeteria, and dedicated vehicle maintenance areas at subsidized rates. By focusing on both operational precision and driver well-being, the CPP serves as the anchor of our port's efficiency, ensuring that every container movement is backed by world-class support systems.

Through these advancements, JNPA is actively building port logistics that are smarter, faster, and more human-centric.
